Dear Dr. Coleman:

Great seeing you and Walter in November. Hope that videotape turned out okay!

Several things:

I have enclosed part of an article about the Ingersoll Gender Center in Seattle. Apparently they know some "transhomosexuals" and I thought you might want to contact them for details.

I am most anxious to know if your case study of me hit the press. Went to check at the Univ. of Calif. Medical Ctr library, but they don't carry the Journal of Psychology & Human Sexuality. Please rush me copy if it is out. Thanks.

The Advocate has commissioned me to write an article for them on the female-to-gay male, due Feb. 15, in which I will mention the research you and Walter have done. I am wondering if I can get an abstract or copy of the paper Walter presented at the '87 Benjamin Symposium on female-to-gay males. I was in Reno a few weeks ago to see Ira Pauly again, and his xeroxed abstracts didn't have anything on Walter's talk. I'd dearly love a copy, since that presentation was a milestone for us female-to-gay males.

I also noticed in Pauly's '87 abstracts a listing for "Mannengroup Nederland," a F-M group. I'd very much like to make contact with them, but they only give a name (Jean van Aarle) and phone number. Do you or Walter have an address for this group?

Last, but not least, I plan to hold another Female-to-Male Get-Together on Sunday, April 9. This might be a wonderful opportunity for you (and/or Walter) to come to San Francisco and interview several female-to-gay males who will be attending (such as Terry from Hayward, Jeff from Los Angeles, Dennis from Philadelphia, and maybe Alex from L.A.).

As for me, I've been feeling all right, but can see how the AIDS "wasting syndrome" takes its toll. Well, that's all for now. Looking forward to hearing from you,

Warm regards,

Lee Sullivan

Hello to Walter!
